

## Competence development with TRESU Academy.

### Operator training for operational efficiency

Our TRESU Academy ensure training of press operators in both basic flexo training and advanced training including recipe management, waste reduction, safety, recalibration, and overall best practices operating high performance flexo technology equipment.

In fact, we can even manage operator competence mapping and development and issue certifications to operators at different levels of expertise.

### Maintenance trainings and workshops

Through our training programs we can teach the competence to perform better maintenance and reduce the occurrence of unplanned stops and length of planned stops.

This includes specific training in maintenance procedures, press adjustments, alignment and replacement of spare parts.

With onsite TRESU Academy sessions we also guide customers' maintenance staff how to perform service solutions from corrective to predictive maintenance minimizing downtime and avoiding unexpected breakdowns:

- Corrective maintenance
- Preventive maintenance
- Troubleshooting
- Predictive maintenance

Conducting maintenance workshops, we go in depth with optimal service and maintenance.

### TRESU Academy added more than 200 hours of production time – and increased quality

Upon finalizing TRESU Academy at a customer producing with an average of 5 daily job changes, training the customer's operators in more efficient job processes idle time was reduced from 35 min to 21 min per job change.

With TRESU Academy the customer was able to reduce downtime by 70 min per day – in a year this converts to more than 200 hours of added available production time – with significantly improved quality and less waste.
